## Biomedical Ethics, Gene Doping and Sport

by **Dr. Andy Miah, University of Paisley, Scotland, UK**

ROUTLEDGE

Routledge  
Taylor & Francis Group

"Genetically Modified Athletes provides a comprehensive analysis of how genetic technology will be used to enhance sports performance, and how our existing framework for dealing with the problem of sports doping is inadequate on both practical and ethical grounds."

**Prof. Francis Fukuyama, Johns Hopkins University, USA**  
author of *The End of History and Our Posthuman Future*

"Andy Miah provides an incisive analysis of some of the most difficult issues facing anti-doping authorities. The research is thorough, the argument is perceptive and the conclusions are challenging. Compulsory reading for anyone interested in the future of anti-doping policy."

**Prof. Barrie Houlihan, Loughborough University, UK**  
author of *Dying to Win and Sport, Policy and Politics*

Foreword by

**Thomas H. Murray, PhD**  
President, The Hastings Center, USA

Reviewed in: **The Lancet, Genomics, Society & Policy, Yale Journal of Public Health, Sociology of Sport Journal, Scandinavian J of Medicine & Science in Sports, Times Higher, Sport in Society,**

*GMathletes is the first book length analysis of the complex ethical problems arising from the new technology of gene doping. This controversial subject will be of interest to a wide range of scholars and practitioners in sport and bioethics.*

ETHICS AND SPORT

## genetically modified athletes

biomedical ethics, gene doping and sport  
Andy Miah

### Contents

#### **Introduction: Anti-Doping and Performance Enhancement**

Why genetics now? I: Why Not Dope? II: Forget Drugs & the Ideology of Harmonisation

#### **Conceptualising Genetics in Sport**

III: What is Possible? IV: Interests, Politics, & Ways of Reasoning

#### **The Ethical Status of Genetic Modification in Sport**

V: Humanness, Dignity, and Autonomy VI: Personhood, Identity, & the Ethics of Authenticity

VII: Virus, Disease, Illness, Health, Well-Being and Enhancement VIII: Unfair Advantages & Other Harms

#### **Genetically Modified Athletes**

IX: Enhancing, Altering, or Manipulating People? X: Sport Needs Genetic Modification

XI: Conclusions & Implications
